

RE CHEM SERVICES GmbH - Mohrmannsweg 25 - 28790 Schwanewede

## Decon Aid Conc.

---

remove all petrochemical residues from tanks, reactors etc. whilst protecting users and the environment from benzene and other hazardous hydrocarbon vapours.

- increase plant availability/shorten decontamination process \*
- improve system performance/reduce plant maintenance downtime
- reduce energy consumption compared with steam process of decontamination
- increase environmental/personnel safety in line with EU and US legislation
- biodegradable/free from carcinogens/environmentally friendly
- application support from experienced engineers and chemists

*\* typically up to 50% of the time taken by a steam process*

## Application

CLX is designated specifically for the hydrocarbon industries:

Crude units	Fluid catalytic crackers
Cracked gas compressors	Hydrotreaters
Ethylene quench systems	Desalters
Hydrocrackers	Gas treating
Solvent refining	Thermal crackers
Reforming and isomerization	Exhaust air scrubber

## Dosage

Typically 1% aqueous solution of total unit (tower) volume per treatment.

**RE CHEM SERVICES GmbH** - Mohrmannsweg 25 - 28790 Schwanewede

## **Availability**

Delivered from our manufacturing facility in 1000 L IBCs.

Delivery time: 3 weeks from receipt of order.

Manufactured to ISO 9002 quality standards.

## **Usage/Toxicity**

For usage, safety and handling guidelines refer to the appropriate RE Chem Services Material Safety Data Sheet (MSDS).
