

**RE CHEM SERVICES GmbH** - Mohrmannsweg 25 - 28790 Schwanewede

## Rust Inhibitors

---

treat automotive gasoline/diesel and home heating fuels. Prevent damage from corrosion at all stages from refinery to fuel tank.

- effective on a broad range of fuels
- offer protection throughout fuel distribution network, including pipelines
- substantially reduce risk of filter blocking corrosion products
- compatible with wide range of multifunctional additive packs
- enable oil companies to pass essential ASTM D665 A- and B- tests
- contain no metals, eliminating any contribution to high temperature corrosion during combustion

## Application

RE Chem Services rust inhibitors are designed for use at all stages of fuel distribution network.

## Dosage

To pass ASTM D665 A tests, typically 5 - 10 ppm

For "Sea water" test (ASTM D665 B), typically 20 -30 ppm

For pipeline protection, typically 10 - 30 ppm

## Availability

Delivered from our manufacturing facility in 200 L drums or 1000 L IBCs.

Delivery time: 3 weeks from receipt of order.

Manufactured to ISO 9002 quality standards.
